## **DETAILED ACTION**

## Allowable Subject Matter

- 1. Claims 40-59 are allowed.
- 2. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach a multistage analog signal sampler that comprises an amplifier, an integrator that integrates the output of the amplifier, a comparator that compares the integrated signal with a threshold, an adder that adds a previously defined correction to the integrated analog signal; the prior art does not also teach an analog to digital converter that comprises an analog circuit that provides an analog monitoring outputs based on an analog input signal and discrete correction signals that are jointly related by a relationship having an identification algorithm, the analog monitoring outputs and a synchronization clock implement a negative feedback control loop in order to keep one of the analog monitoring outputs within a previously defined constant; in addition, the discrete correction signal performs a negative feedback control loop which controls the analog input signal.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Application/Control Number: 10/568,079

Art Unit: 2819

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peguy JeanPierre whose telephone number is (571) 272-1803. The examiner fax phone number is (571) 273-1803.
